JANUARY IS MORE

*"I have had a glimpse into another world,
another culture . . . a beautiful experience."*

*"I learned how much more I need to know,
and learning has a purpose for me now."*

"A further result of my studies this month is that I have definitely decided to apply to graduate school with the hope of obtaining my Doctor of Philosophy degree in Anthropology."

"Philosophy of mathematics is a fascinating subject, and without the Winter term I would never have had time to do all this reading or to get the overall picture of mathematics and its purpose."

"With the variety of things going on, there was a cross-pollination between disciplines that you don't get with the ordinary routine."

WINTER TERM COURSES and SEMINARS

Students may elect any of the following courses proposed for January 1973:

Advanced Study in International Politics
focus on recent or current problems

Analysis of the Intelligence and Instinctual Behavior of the Horse
exploratory experiments and research

Animal Behavior in Space and Time
orientation, navigation, and timing

The Nursery and Kindergarten Child: Theory and Practice

Population Problems

Readings from Kantian Ethics and The Bhagavad Gita

Seminar in Chemistry

Spanish Conversation

Women in British History of the 19th and 20th Centuries

Digitized by the Internet Archive
in 2011 with funding from
Lyrasis Members and Sloan Foundation

THAN JANUARY: it's Winter Term

Variety is the keynote, originality the theme, of Winter Term. Four weeks set apart for digging into a course or seminar not regularly offered; for individual projects, approved by an adviser, on campus or far afield; for gaining practical experience which tests theoretical learning and may lead to a future career.

Many students remain at college to take a concentrated course or seminar, or to work on projects in the immediate area. Others try their wings in distant places: living in a kibbutz in Israel; working in a legal aid office where fluency in Spanish is required; doing independent biological research in the Bermudas; serving as interns in government agencies or getting into the political scene in Congressional offices; exploring the musical world of Vienna; gaining experience in welfare departments, hospitals, mental health centers; teaching French in high school or language skills to disadvantaged children; visiting Russia on a study tour; living with a black family in a rural community; counseling adolescents in Greenwich Village; pursuing ethnological studies in Mexico.

Winter Term is a time for exploring, testing, experimenting; for open-end learning with hands and head; for stretching the imagination and extending one's horizons.

It's a chance to thaw ice-bound buds and let them expand.
